-

PROJECTS

Phirse - Capstone Project

July 2025 - Jan 2026

- **PHP, MySql**

Student-centered reservation platform for organizations at Pamantasan ng Lungsod ng Valenzuela.

Pixora - Personal Project

March 2026 - March 2026

- **Tailwind CSS, PostCSS**

An AI-powered photobooth app. Take selfies, apply filters, and download your photos.

Yugenime - Personal Project

April 2026 - Present

- **React.js, Vite, Vanilla CSS, Framer Motion, Lucide React**

Yugenime is a modern and easy-to-use website for anime fans. It lets you discover new shows, track your episode progress, and check airing schedules all in a clean, premium design that works perfectly on both desktop and mobile.

Mnlxplore - Group Project

May 2026- Present

- **Next.js 14, Express.js MongoDB, Tailwind CSS**

MNLXPLORE is an AI Travel Assistant specifically made for Metro Manila.

It helps travelers plan their trips easily by automatically generating a daily schedule (itinerary).
